(IsraelNN.com) A member of Iran's Supreme Council for Cultural Revolution has claimed that the Pope traveled overseas to compensate alleged victims of sexual attacks by alleged homosexual priests. The [comments](#) of Hassan Rahimpour Azghadi were made several months ago and translated for publication on Wednesday by the *Middle East Media Research Institute (MEMRI)*.

Azghadi, addressing viewers on Iranian television, charged that the pope traveled to the United States and Australia to compensate victims of alleged sexual abuse by priests.

The Iranian official's function is to help export the Islamic Revolution and act against Western influence and feminism.

He stated in one speech, "The corrupt Pope went on a tour in order to cover up the homosexuality of his priests. As you know, he made a tour from America to Australia, saying: 'We are sorry that our priests are pedophiles and homosexuals.' ... He paid three billion dollars in compensation to families whose little children were abused by priests in churches. But nobody sees what the pope himself does in the Vatican. It's not clear who should apologize for the pope's deeds."

In another speech, he took aim at the U.S., stating its values are "sex, violence and melancholy." We do not want to coexist with America. We want to combat America – not just America, but Zionism, England, and the leaders of global capitalism, who are exploiting the Muslims and the oppressed throughout the world," said Azghadi.

He also claimed that the U.S. suffered almost no casualties in World War II because it entered in the final stages, although historians estimate the number of American casualties to have been between 300,000-400,000.

"In the many films about World War II, which you must have seen, the main characters are always American or English, and each of these characters kills 2,000 or 3,000 Germans singlehanded," he declared. "They produce hundreds or thousands of films about operations that never took place, heroic feats they never accomplished, and sacrifices they never made. They are highly skilled in this."

Azghadi concluded that the history of the war was recorded according to the victor. He said if the German-Japanese axis had won the war, "All the negative things said about Fascism and Nazism, and all the talk about a free world – it would all have been reversed. If the Communists had prevailed, the regime of liberal capitalism would have disappeared, and everything would have been recounted from a Communist perspective."
